Your Contribution to Data Protection

Media Upload

While not possible for you on this site, remember to remove EXIF Data from your pictures, if you upload some to any web server. If you leave the EXIF data in the picture, the your pictures might tell others where you were and when.

Linux provides the following command for this task.

```
$ jhead -de your-picture.jpg

Secure Connection Route

The security of the connection route in the internet cannot be secured by the server administration alone.

Check always before registering at, or login to a site, whether the HTTPS connection is secure and is using the correct certificate. With this you contribute to the safety of your data.

Secure Password

Choose a secure password for your account, 20 Character are no problem, and use lower- and upper-case letters as well as special characters and numbers. Use a password always for one site only.

Embedded Content from Other Sites

This site does not embed content from other sites. This gives you the security that you are not visiting additional sites without your knowledge, just by viewing an article from me.

For the same reason this site will not accept the embedment of content hosted on other servers by you, if and when a comment feature gets implemented-

All content shown is hosted on this server and no external services are embedded.

Citations and Links

Content from other sites gets cited on my site in Sound, Letter and Image, and in these cases I provide links to the original site as reference. It stays your decision to use those links and to visit those sites.

An alienation from cited statements and other cited content or from the content of linked third party pages is not possible for me, **because such alienation requires closeness.**

Citations and links point to the opinions and the content of third persons. I do not express or establish any agreement or proximity to the views held or to the content provided by those third persons by providing a link to the source of a citation I used.

Should you consider the views or content of third persons worth a legal pursuit, please direct your legal actions to those third persons.

This note addresses the judgement made on May 12, 1998 "Haftung für Links" (312 O 85/98), in which the Landgericht Hamburg decided that offering a link makes you potentially responsible and liable for the content on the linked site.
